One-stop shopping:
Data, Documents, Web Resources, Tools

The California Climate Commons is the digital library of the California Landscape Conservation Cooperative, providing access to LCC-funded projects from proposal to completion.

The Commons helps natural resource managers navigate climate change science, understand available resources, and quickly find what they need from a wide variety of sources.

Project Metadata Record with Product Listing

Unlocking the data: access intended for real users

Catalog records describe the data, link to the source of the data and any related documents, websites, and tools.

When products are ready for release, they are cataloged in the Commons and hosted if needed.

Data Management Planning, an important step

Project leads create a Data Management Plan that tracks project deliverables and how data will be accessed.
